

Join the
**INTERNATIONAL MAX PLANCK RESEARCH SCHOOL for Biology and Computation
in Berlin**

PhD positions available at Max Planck Institute for Molecular Genetics and Freie Universität Berlin

Research projects are available in:

Epigenetics
Gene regulation
RNA biology
Developmental biology
Structural biology
Protein biochemistry
Molecular evolution
Sequence analysis
Bioinformatics
Mathematics
Statistics
and more

We offer:

- Dual education in experimental and computational science
- Cutting-edge research and state-of-the-art facilities
- 3 years' funding to work on your doctoral project
- A degree from Freie Universität Berlin
- Excellent supervision through a thesis advisory committee
- A diverse community to exchange ideas with
- A flexible and challenging curriculum
- The opportunity to travel to present your work
- An international program in one of Europe's most exciting cities

We are looking for:

Talented, creative and enthusiastic graduates from all over the world with a strong passion for working at the interface between biology and computation
